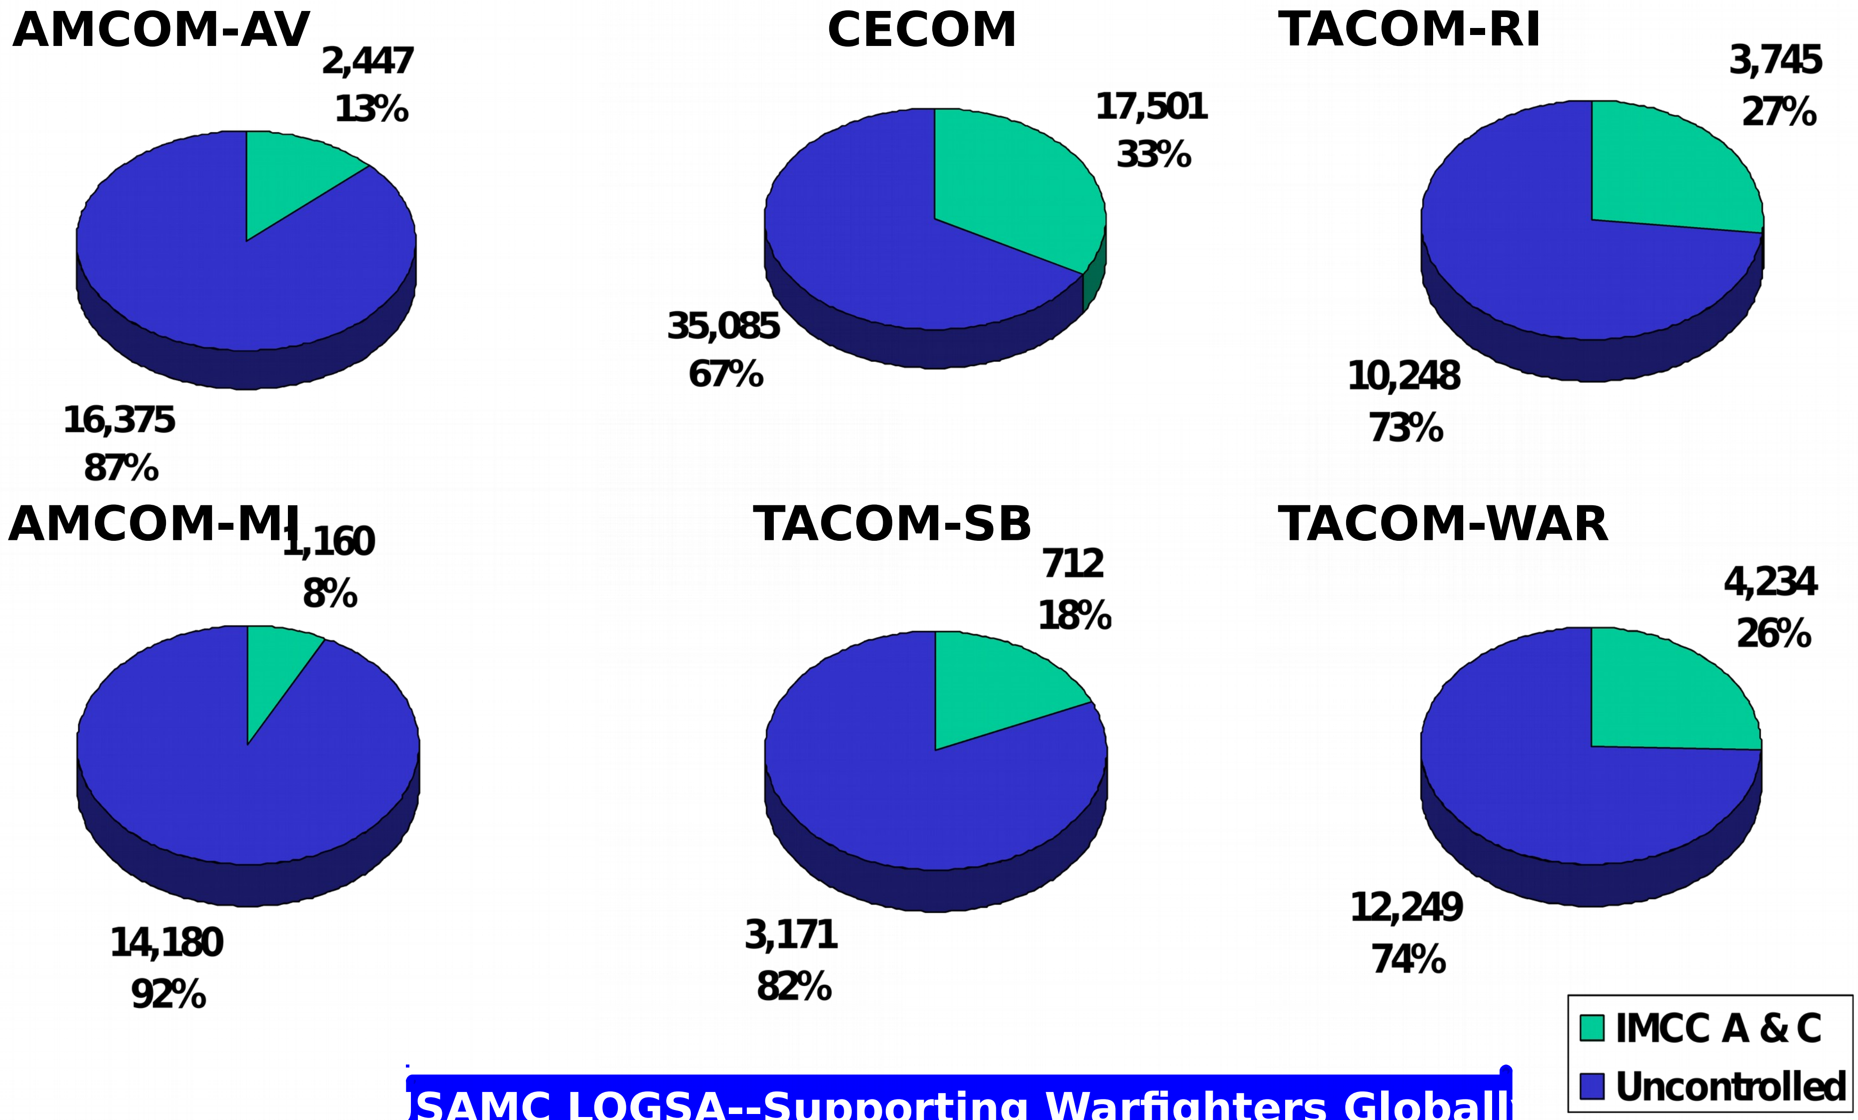
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – OCT 06



Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,253	1,194
AMCOM-M	895	265
CECOM	17,233	268
TACOM-W	592	3,642
TACOM-R	1,703	2,042
TACOM-SB	581	131

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
